TennCare and Trading Partner may be referred to herein individually as “Party” or collectively as “Parties.”

1. PURPOSE and BACKGROUND

- 1.1 TennCare by law, in its capacity as the Medicare/Medicaid Agency for the State of Tennessee, must operate the TennCare Medicaid Management Information System (TCMIS). The TCMIS system contains information regarding claims adjudication, eligibility verification, prior authorization and other information related to the TennCare Program.
- 1.2 TennCare owns the data in the TCMIS and operates the system in which the claims and eligibility data flow. Trading Partners provide the pipeline network for the transmission of electronic data; thus, are required to transport TCMIS data to and from TennCare and providers of TennCare services.
- 1.3 This Agreement delineates the responsibilities of TennCare and the Trading Partner in transporting TCMIS data for TennCare in its’ operation of the TennCare Program.
- 1.4 This Agreement is ancillary to the Contractor Risk Agreement (CRA) and Business Associate Agreement (BAA) entered into between the parties where applicable. The provisions of the CRA and BAA are hereby incorporated by reference and shall be taken and considered as a part of this Agreement the same as if fully setout herein.

2. SCOPE

- 2.1 System Access. TennCare agrees to provide Trading Partner with electronic access to TennCare TCMIS systems and network for the purpose of exchanging transactions via Trading Partners' computer systems and network or their authorized designee's computer systems and network.
 - 2.1.1 Trading Partner may execute a contract with TennCare service providers, or their authorized designee (clearinghouse, VAN, billing service, etc.), providing all necessary authorizations to the Trading Partner for submitting and receiving TennCare TCMIS data. Said contract must stipulate that providers use software tested and approved by Trading Partner as being in the proper format and compatible with the TennCare TCMIS system.
 - 2.1.1.1 Trading Partner agrees that the TennCare TCMIS data transmitted or received by it will be released only to the authorized party requesting information that has a signed contract with Trading Partner.
 - 2.1.2 Prior to the submission of any transactions to the TennCare TCMIS production systems, Trading Partner agrees to submit test transactions to TennCare for the purpose of determining that the transactions comply with all requirements and specifications required by TennCare.
 - 2.1.3 Successful transaction testing must be achieved for each provider number that the Trading Partner represents before any production transaction submissions for that provider. No electronic transaction received by TennCare for providers without successful transaction testing will be processed.
 - 2.1.4 The parties agree that TennCare will make the sole determination that test data is acceptable and that transaction testing is successful. This capability to submit test transactions will be maintained by Trading Partner throughout the term of this Agreement.
- 2.2 Transaction Types. Trading Partner agrees to submit to the TennCare TCMIS only those individual transaction types for which specific approval from TennCare has been requested and received via the Electronic Data Interchange (EDI) Request Form. Prior to the submission of any transaction types to the TennCare TCMIS production system, or as a result of making changes to an existing transaction type or system, Trading Partner agrees to submit test transactions to TennCare for both the additional and any previously approved transaction types.
- 2.3 Data Submission. Trading Partner shall prepare and submit or receive TCMIS data using network connectivity, protocols, and media approved by TennCare.. The addition and deletion by TennCare of approved submission network connectivity, protocols, and media may occur from time to time. Whenever a network connectivity, protocol, or media is deleted from the approved list TennCare will supply the Trading Partner with ninety (90) days notice of the impending deletion.

- 2.3.1 An ASCII format is expected for all transmissions that are not NDM based.
- 2.3.2 Transmission Speed. For electronic transmission, such as FTP, that does not involve the physical exchange of storage media the Trading Partner agrees to provide a minimum design transmission speed of 56 kilobits per second (KBS) with an effective transmission speed of at least eighty percent (80%) of the design transmission speed on a dedicated, secure channel from the Trading Partner data center to the TennCare facility. . Trading Partner is free to choose type of channel and ultimate speed above 56 KBS. The Trading Partner must coordinate with TennCare any equipment selection or changes to ensure compatibility with the TennCare facilities. Trading Partner is responsible for all costs including installation costs, equipment, and line charges.
- 2.3.3 Trading Partner must encrypt all data transmitted on channels not otherwise secured and maintain full compatibility with TennCare facilities. TennCare reserves the right to determine when encrypted transmissions are necessary and what encryption technologies and implementations are considered sufficiently secure.
- 2.3.4 Trading Partner must be capable of compressing and transmitting and receiving and decompressing transaction data files that are compressed and decompressed using the algorithms commercially known as zip or gzip.
- 2.3.5 Trading Partner will execute a network connectivity agreement with the State of Tennessee.

The Trading Partner must indicate their acknowledgement intent for every transaction on the EDI Request Form.

 - 6.4.1 The Trading Partner may provide a GS02 sender code on the EDI Request form. This code will be used as the GS03 receiver code for transactions originating from TennCare. A default value of the Trading Partner’s submitter ID will be used if a value is not specified.

Email created, sent or received in conjunction with the transaction of official business are public records in accordance with T.C.A 10-7-301 through 10-7-308, and the rules of the Public Records Commission. A public record is defined as follows:

“Public record(s)” or “state record(s)” means all documents, papers, letters, maps, books, photographs, microfilms, electronic data processing files and output, films, sound recordings or other material, regardless of physical form or characteristics made or received pursuant to law or ordinance or in connection with the transaction of official business by any governmental agency. (T.C.A. 10-7-301 (6)).

State records are open to public inspection unless they are protected by State or Federal law, rule, or regulation. Because a court could interpret state records to include draft letters, working drafts of reports, and what are intended to be casual comments, be aware that anything sent as electronic mail could be made available to the public.
